THE MODERN FAN CO

UL

The Aurora ceiling fan is an innovative design incorporating a 40-watt, T-5 circline lamp positioned in a translucent diffuser. This lamp and diffuser combination provides the incandescent equivalent of 180 watts of color-corrected, energy-saving fluorescent light, both up and down. Useful and ample light can now come together with a ceiling fan.

# AUR	finish	blade diameter	blade color	control option > page 22
