

Halo

14

Fan with
Fluorescent
Light Option

The Halo is a classic integration of form and function, combining a refined aesthetic with state-of-the-art air movement and quality lighting. The fan's decorative characteristics emerge from the warm tones of glowing amber glass or the crisp combination of the nickel finish with all opal white glass. The Halo uniquely stands out as a fixture that functions equally well as a luminaire as it does a ceiling fan.

| # HAL | finish/glass | blade diameter | blade color | light option | control option > page 22 |
