

Nimbus

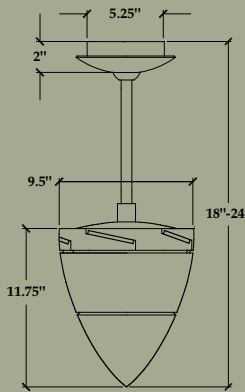

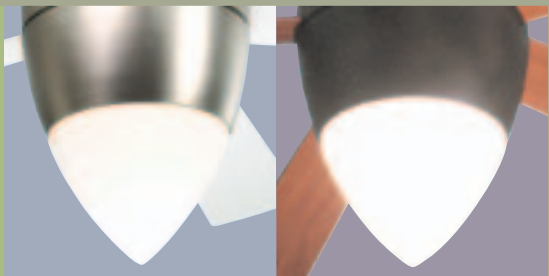

15

THE MODERN FAN CO

UL

Suitable for damp locations

The Nimbus is an early representation of Ron Rezek's pursuit of improved solutions for fan/light combinations. Positioning the rotor at the top of the body allows plenty of room for integration of a well-proportioned light. A larger scaled fan, the soft taper of the Nimbus body allows this design to fill an open space without being distracting.

# NIM	finish	blade diameter	blade color	control option >page 22
	MN Matte Nickel	52 52" Span	WH White	NC No Control
	DB Dark Bronze	42 42" Span	NK Nickel	002 Fan Speed/Light
