

Pharos

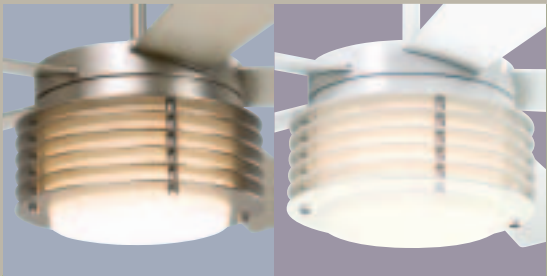

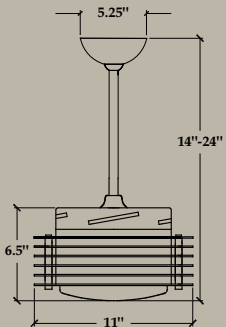

6

THE MODERN FAN CO

UL

Suitable for damp locations

The larger-scaled Pharos pairs a powerful motor and advanced design principles to provide outstanding air distribution and useful light. The fan's primary feature, a series of rings (or louvers), gives it a "deco" style and eliminates glare from the 120-watt light source.

# PHA	finish	blade diameter	blade color	light option	control option > page 22
