

Stratos

19

THE MODERN FAN CO

UL

Suitable for damp locations

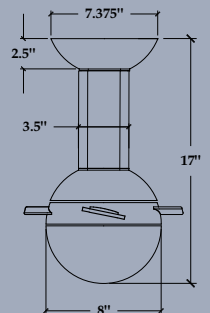

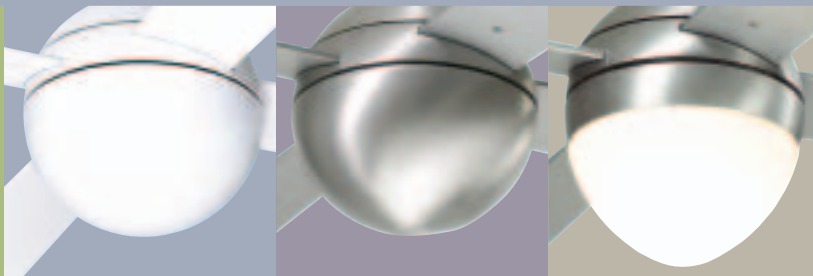

ENERGY STAR

Fan Only

Designed in 1986, the Stratos was the first truly modern ceiling fan. It has no reference to the Victorian-era designs that pervade the fan industry. Among its innovations is the column-like support in place of the down rod used on other fans, lending a sense of attachment to the architectural space. The Stratos also introduced Ron Rezek's patented, single-piece, die-cast rotor, which continues to be the signature element of nearly all Modern Fan designs.

650 Light Kit (adds 1")

# STR	finish	blade diameter	blade color	light option	control option >page 22
